## ✓ Welcome to NDrive!

Dear Customer,

Thank you for selecting NDrive as your navigation software. This guide is created so that you can find quick and simple answers to your questions, considering both basic and advanced features, so that you can get more of this application.

Ready to start? Then tap this button on your Android device

## ✓ V11 Highlights

Our latest software version brings you a set of new features focused on interaction, networking and integration. The new clean and elegant user interface allows you to easily use the application and gives also emphasis to the integration of social networks in NDrive, giving you the possibility to interact with your friends directly from the application. NDrive offers you also the possibility to take advantage of attractive local offers, which will pop-up in the user interface. Services like weather forecast and traffic will certainly improve your user experience.

## ✓ Main Map Screen

The main map screen can be presented in 3 different modes:

### Map view

This will be the default main map screen from version 11.2 on, with the main differences pointed out.

## Navigation

(\*) – Time, speed and distance controls show different information, by toggling among the alternative modes:

 - Estimated time left to destination

 - Speed limit on the current street

 - Current speed

 - Estimated time of arrival

 - Distance left to destination

 - Current time

**Context**

If you click on any point on the map, the context bar shows up on the bottom and these four actions can be performed.

**✓ Basic Interaction**

**Exploring menu screens**

All menu screens show, on top, two buttons which allow for the following actions:

↓  
Go back to previous screen screen

↓  
Return to main map screen

**Using keyboards**

Whenever you want to perform a search, filter results from a list or input data, the keyboard will appear on screen. Different keyboard layouts can be selected on Settings. Here are some tips you should keep in mind:

- When searching for a street, you can simply write the initials, separated by a space, and results will show up. Example: enter “C P W” and “Central Park West” will show up on the results list.
- Start writing the first letters, and results will be automatically updated on the list below.

## Performing a search

When a search is being performed, this type of screen allows you to enter search details, to filter your results.

## Go screen

After performing a search or selecting a POI on the map, the Go Screen will be shown. This screen allows you to perform several actions, based on the location you just selected:

## ✓ How to Navigate...

### Navigate to an address

From the main menu select **Go To**  and then **Address** .

After inputting the address click .

### Input an address

Select Country, State (when available), City. Afterwards type in the Street name and house number.

 See Basic Interaction section for keyboard input options.

### Navigate to a Point of Interest (POI)

From the main menu select **Go To**  and then **Places** .

Then select **Around Me**  or **In a City** . You will see the Places grouped in categories. Select the desired category or specific attributes and use the keyboard to filter your search. After completing your selection, click . You may also select **All** and search for a location name within the entire database; note that this will take longer.

Among the available categories, you will find Dynamic POIs, which are basically points of interest whose information changes according to the location and time, for instance Pharmacies or Events [requires internet connection for information update]

 Alternatively, simply click on a POI, or any other point on the map, and then click on the Navigate button on the bottom bar. See Main Map Screen section.

## Navigate to a Postcode

From the main menu select **Go To**  and then **Places** . Select **Postcode**  and after selecting the country, use the keyboard to filter your search. After completing your selection, click .

## Use coordinates to navigate to a location

From the main menu select **Go To**  and then **Places** . Then click **Coordinates** , use the keyboard to input the location's coordinates and click . After completing your selection, click .

## Perform a Google search to navigate to a location

From the main menu select **Go To**  and then **Places** . Then click **Google**  and use the keyboard to filter your search. After completing your selection, click .

## Navigate to a recent location

From the main menu select **Go To**  and then **Recent Location** . After selecting the desired location from the list, click on .

## Save my favourite locations

From the main menu select **Go To**  and then **Address** , **Places**  or **Recent Location** . After completing your selection, click on .

Alternatively, simply click on a POI or any other point on the map, and then click on the Add to Favourites button  on the bottom bar.

Complete the fields you wish to detail, and then click  to add this to your Favourites.

See Basic Interaction section for keyboard input options.

## Navigate to my favorite locations

From the main menu select **Go To**  and then **Favourites** . Use the scroll bar or the keyboard to filter your search. After selecting the desired location from the list, click **Navigate** .

 You may type in either the name or the tag of the favourite you have previously defined. NDrive will filter your search according to both fields.

## Navigate Home

From the main menu select **Go To** , **Home**  and then **Navigate** .

## Define my Home

From the main menu select **My NDrive**  and then **Define Home** . Input an **Address** , select a **Place** , **Recent Location** , **Favourite** , or the current location, according to GPS signal or to your previous selection on the map - **Here** . After completing your selection, click on **Save** .

The first time you try to navigate home, if you haven't previously defined your home location, NDrive will ask you to set that location. It is possible to edit it at any time, following the steps described above.

## Stop navigating in the current route

From the main menu, click **My Route** , and then **Stop Navigation** .

## See an overview of my route

After defining a route and during navigation, you can see an overview of the whole route by clicking **My Route**  on the main menu, and then **Show Route** .

## See the list of all maneuvers included in my route

From the main menu, click **My Route** , and then **Roadbook** . Scroll down to see all the items on the list.

## Delete a favourite location

From the main menu select **Go To**  and then **Favourites** . Use the scroll bar or the keyboard to filter your search. After selecting the desired location from the list, click **Edit**  and then **Delete** .

## Delete recent locations

From the main menu select **Go To**  and then **Recent Location** . Click **Delete** to clear all recent locations.

## Use itineraries

From the main menu select **Go To**  and then **Itineraries** . You can then create a new itinerary, or select an itinerary from the list, if you have already created any.

- Create an itinerary

To create an itinerary, click **Add New Itinerary** . Edit the name and the description by selecting them and using the keyboard. You can also add an icon, by clicking on the **ICON** button  and selecting one from the list. Click **Save** to proceed. Afterwards, you will have to define the waypoints to be included in your itinerary. Click

**Add New Waypoint** , selecting from **Address** , **Places** , **Recent Location** , **Favourites**  or **Home** . After completing your selection, click **Save** and repeat the process for each new waypoint. When you have finished adding waypoints, click **Save** to finish creating the itinerary.

You can also add a waypoint by selecting any point on the map, and clicking the waypoint shortcut, on the context bar. Then you can either add it to an existing itinerary, or create a new one, where the selected waypoint will be included.

- Change an itinerary

After selecting the itinerary from the list, to edit the itinerary's name, description and icon, click **Edit/Rename**  and proceed as described in "Create an itinerary".

To edit the itinerary's waypoints, click on **Show Waypoints** . You can then add a new waypoint as described in "Create an itinerary". You can also select each waypoint and perform several actions:

See waypoint's location on the map;

Mark waypoint as visited, so that when you are navigating the itinerary, you skip that location;

Move the waypoint up on the itinerary's list;

Move the waypoint down on the itinerary's list;

Mark waypoint as the next destination and all the previous ones as visited;

Delete waypoint from the itinerary.

- Navigate to an itinerary

After selecting an itinerary from the list, click **Navigate** . The route from your current location to the first waypoint on the itinerary will be calculated.

You can also see the whole itinerary on the map, by clicking **View On Map** .

The first waypoint is represented by a green flag and the last one by a checkered flag (black and white). The waypoints in between are marked with orange flags.

## Use the Traffic Service

After calculating a route, if traffic service is available, the traffic bar will show up on the map.

The traffic menu can also be accessed from the main menu, by clicking **My Route**  and then **Traffic** . From there you can access several options:

**TRAFFIC EVENTS**  To avoid a specific traffic event, select it and then click **Avoid**. The route will then be recalculated; please bear in mind that if avoiding a certain traffic event is not the better option for your route, your selection will be ignored when recalculating.

**UPDATE TRAFFIC**  Click on this button to update traffic information.

**TRAFFIC OPTIONS**  Click on this button to change the traffic options settings.

**AVOID JAMS**  Click on this button to recalculate the route avoiding traffic jams. If this button has already been selected, it will show "Delays minimized" 

## Manage alternative routes

From the main menu select **My Route**  and then **Alternatives** . If you click **Calculate Alternative** , an alternative route will be calculated, according to the defined routing options. If afterwards you prefer the first route, click **Calculate Original** .

## Avoid going through specific streets or roads

From the main menu select **My Route**  and then **Alternatives** . Click **Avoid Part Of Route** , select the segments you wish and then click **Avoid** . A new route will be calculated accordingly. If afterwards you prefer the first route, click **Calculate Original** .

## Find an alternative when there is a roadblock ahead

From the main menu select **My Route**  and then **Alternatives** .

Click **Roadblock** , and then select the most appropriate option to define how far it is from your current location

A new route will be calculated accordingly. If afterwards you wish to select the previous route, click **Calculate Original** .

 See Basic Interaction section for keyboard input options.

## ✓ Customizing Your NDrive

### The speaker volume

From the main menu select **My NDrive** , **Settings**  and then General. Use +/- to adjust the volume according to your preference. It's also possible to quickly adjust the volume from the Main Map Screen, simply by clicking on the Lower Bar placed near the Menu button at the bottom of the screen and sliding your finger across it.

### The language

From the main menu select **My NDrive** , **Settings**  and then ; click on Language and then select from the available options. To confirm, click on **Save**.

### The speed unit

From the main menu select **My NDrive** , **Settings**  and then . You may choose to display the velocity in kilometre per hour (kph) or miles per hour (mph). To confirm your choice, select **Save**.

### The temperature measurement unit

From the main menu select **My NDrive** , **Settings**  and then . The temperature can be displayed in Celsius or Fahrenheit, according to your preference. To confirm your choice, select **Save**.

### The map appearance

From the main menu select **My NDrive** , **Settings**  and then . The following items are customizable:

- Lane Assistance

Displays information about the lanes on junctions and turns. In Intersections, it will display the signposts allowing you to pick the right lane. You may choose between simplified and detailed view.

- Map North Up

This option is only applicable to Pedestrian and Adventure modes. When enabled, the map will be displayed with North orientation and the locator will rotate according to your movements. When disabled, the locator will be pointing up and the map will rotate according to your movements. *[This option will be available in version 11.2]*

- Templates

The map colour scheme can be customized according to the time of day, choosing among the available templates. If you select "Enable auto toggle" the colour scheme will change automatically between day/night mode, according to a specific schedule defined by the system.

- Points of Interest

Select from the POIs categories list, the ones you wish to be displayed on the map.

## The routing options

From the main menu select **My NDrive** , **Settings**  and then . You may select among the following routing options, which will influence the routing calculation:

- Fastest – calculates the fastest route, regardless of the distance. It is highly recommended that you select this option: the planned route will be not only the fastest, but also more economic and pleasant, since better and faster roads such as highways are given priority.
- Shortest – calculates the shortest route, regardless of the quality of the road. Note that this route may take more time and some of the roads may be narrow or steep.
- Tolls – select "avoid" if you don't want to use toll roads on your route or "yes" to allow NDrive to use tolls on route calculation. Please note that even if you've selected the option "avoid", NDrive will consider toll roads, if that is the only option.
- Pedestrian Mode – NDrive will calculate your route using the shortest path available for walking or riding a bicycle; routing calculation will not consider traffic signs and routing is limited to 20 km distances.
- Adventure Mode – allows you to navigate to a location or coordinates off the beaten track; select this mode for outdoor use or travelling by sea or air. In this mode, the distance to your destination is calculated in direct aerial line and a compass will be displayed to guide you towards your destination.

## Traffic options

From the main menu select **My NDrive** , **Settings**  and then :

- Turn Traffic ON/OFF: when traffic is ON, the route calculation will consider traffic events; when traffic is OFF this option is disabled.

- If you select to avoid jams manually, you will have to select **Avoid Jams**  through the **My Route**  menu during navigation; if you select automatic the routing will be calculated avoiding every traffic jam.

## Safety options

From the main menu select **My NDrive** , **Settings**  and then  to customize the following options:

**Speed Limit Alarm:** an alarm will ring when you exceed the speed limit configured by you (50 kph-160 kph); you may choose to turn off this option

**Road Speed Alert:** you can adjust the way the speed limit of each road is displayed, among visual (an icon will appear on screen), visual and sound (icon on screen and voice indication), or turned off.

- System settings

From the main menu select **My NDrive** , **Settings**  and then  to customize the following options:

**Time format:** select between 12h or 24h format

**Theme:** select between the default theme, which will display red buttons, or rainbow which will display colourful buttons. *[This option will be available in version 11.2]*

**Restore Settings:** select this option to restore the system to default settings

- Coordinates Format

From the main menu select **My NDrive** , **Settings**  and then . The selected format will define the input method on navigation by coordinates; you can choose between the following formats:

DMS: degrees, minutes and seconds

DMM: degrees and minutes

DDD: degrees and decimal degrees

- The weather

From the main menu select **My NDrive** , **Settings**  and then . Clicking on **Weather** you can select ON to display the weather information and forecast for your destination on the Go Screen; if you select OFF this option will be disabled.

## Import data to NDrive

First, you will have to connect the device to your computer using an USB cable, or use a memory card reader. Copy the kml files from your source to the correspondent NDrive folders: "favourites", "itineraries", and "speedcams".

From the main menu select **My NDrive**  and then **Data Import/Export** . Then, according to what you wish to import, select **Import Safety Cameras** , **Import Itineraries** , or **Import Favourites** .

### Export data from NDrive

From the main menu select **My NDrive**  and then **Data Import/Export** . Then, according to what you wish to export, select **Export Itineraries**  or **Export Favourites** . After you perform this action, a new .kml file will be created in the correspondent NDrive folder: "itineraries" or "favourites". You will have to connect the device to your computer using an USB cable, or use a memory card reader to manage the files.

### Report a Map Error

From the main menu select **My NDrive**  and then **Report Map Error** . You will be redirected to our map provider's website and will be welcome to share map errors and suitable corrections. [requires internet connection]

### Know more about my software

From the main menu select **My NDrive**  and then **About** , where you will be able to obtain help on how to use your NDrive, consult information about your software version, and GPS. You can see information about your installed maps, such as version, provider, verify map consistency and also to activate maps with an external code, sent to you by the NDrive support.

## ✓ Getting More of your NDrive

### How to get new maps, voices or other features

NDrive's In App Store allows you to download additional free or purchasable features, such as voices or new maps, enhancing your software and user experience.

From the main menu select **Store**  and then one of the following options:

**Store** – Displays a list of available items, which you can download to your device.

**My Products** – Displays a list of the items purchased by you. Please note that your purchases are stored under your account and you may pass them to your next device according to the NDrive Purchase and Usage Rights policy.

Here is one example of how you can get new features from NDrive's store.

## ✓ How to interact with Social Media

When you run NDrive for the first time, this screen will appear allowing you to login either with both your Facebook and Foursquare accounts, or with just one of them. Alternatively, you can also skip this step.

### facebook

Facebook is a social networking service. As of January 2011, Facebook has more than 600 million active users who may keep up with friends, upload an unlimited number of photos, share links and videos, and learn more about the people they meet. Facebook's mission is to give people the power to share and make the world more open and connected.

#### How to share a favourite?

From the main menu select **Share**  and then **Facebook Favourites** . A list of previously saved favourites will appear and you can select the one(s) you want to share and click **Publish** at the end. This will be automatically posted on your Wall.

From the main menu select **Go To**  and then **Favourites** . Select a favourite from your list and click on the option **Share**. This will be automatically posted on your Wall.

#### How to share an Itinerary?

From the main menu select **Share**  and then **Facebook Itineraries** . A list of previously saved itineraries will appear and you can select the one(s) you want to share and click **Publish** at the end (click here to learn more on how to save a favourite). This will be automatically posted on your Wall.

From the main menu select **Go To**  and then **Itineraries** . Select an itinerary from your list and click on the option **Share**. This will be automatically posted on your Wall.

## How to share my route?

While navigating, select Menu and then **Share** . In this menu, select **My Route Facebook** . The system will ask you to confirm your request by selecting yes. This will be automatically posted on your wall.

## How to share my Location?

From the main menu select **Share**  and then **My Location Facebook** . Your current location will be automatically posted on your Wall.

If you wish to publish any location other than your current one, define it through the **Go To**  menu and simply click on the option **Share**. This will be automatically posted on your Wall.

\*further options include viewing the location on Google Maps™ or even importing it directly to your NDrive.

## How to import a location published by a friend?

Click on the link "Import it on your NDrive" and you will start to download a .kml file. After downloading, copy this file into the FAVOURITES folder on your NDrive. (requires USB connection and file explorer on your computer or device)

Foursquare is a location-based mobile platform that makes cities easier to use and more interesting to explore. By “checking in” via a smartphone app or SMS, users share their location with friends while collecting points and virtual badges. Foursquare guides real-world experiences by allowing users to bookmark information about venues that they want to visit and surfacing relevant suggestions about nearby venues.

## How to navigate to a Foursquare™ venue?

From the main menu select **Go To**  and then **Places** . Then click **Foursquare™**  and select the specific attributes to refine your search (Insert screen). Use the keyboard to filter your search. After completing your selection, click **Navigate** .

- How to define check-in options?

From the main menu select **My NDrive** , then **Settings**  and finally . Select one of the following options:

**Whenever there are nearby venues:** once you arrive at a destination, NDrive will ask if you wish to check-in in a venue located nearby your destination

**When navigating to a venue:** if you are navigating to a Foursquare™ venue, once you arrive at your destination NDrive will ask if you wish to check-in

Check-in will be displayed on your Foursquare™ page.

## Log out Facebook/Foursquare accounts

From the main menu select **My NDrive** , **Settings**  and then . Simply click on Foursquare Logout or Facebook Logout to clear your accounts' information.

## How to share my current location by SMS?

From the main menu select **Share**  and then **SMS Current Location** . The receiver will receive it either as a coordinate by SMS or if NDrive is running, a pop-up screen will appear giving the option to Navigate or Save this location, or to simply ignore it.

## How to e-mail my current route?

While navigating, select Menu and then **Share** . In this menu, select **Email Current Route** . You will be redirected to your email account, where you just need to type in the email address (es). The addressee will receive an email with your route details. [requires internet connection]

Here are the details of my route:

Departure:  
Avenida dos Aliados  
<http://maps.google.com/maps?q=41.146999,-8.611479>

Arrival (at 22:59):  
Guarda  
<http://maps.google.com/maps?q=40.538303,-7.267008>

Routing options:  
Fastest  
Tolls

Sent from NDrive.

## Local Offers

NDrive's new feature gives you the possibility to take advantage of the greatest discounts. Location-based offers are subtly displayed when you are nearby. You'll get the chance to interact with these offers and collect coupons that will give you the best deals in town and then simply drive to profit from them.

- How to take advantage of Local Offers

While navigating, coupons with local offers will be displayed on the bottom of the main map screen. To interact with these coupons simply click on them and a new screen will appear giving you the option to:

- View on Map: view advertiser location on map
- See the coupon/Main Image: switch between main add or coupon
- Save: save the coupon to your Local Offers
- Contact: contact the advertiser
- Navigate: navigate to the advertiser's location

From the main menu select **My NDrive**  and then **Local Offers** . These offers will be displayed as Nearby (near your location), Recent (recently viewed) and Saved (offers you saved) and you have the possibility to interact with them.

## What is...

This button allows you to enter a destination such as an address or a Point of Interest. You can then display it on the map, navigate there or set it as your current location.

Select this button to search for a location by its address.

– Use this button to change the country where your destination is located. You can skip this step if the country is correct.

– Use this button to change the state where your destination is located. You can skip this step if the state is correct. This button is only enabled for countries that are divided into states, such as the USA.

– Type the name of your destination city here. If your city name already appears, you may skip this button and go directly to Street.

– Type your destination street here. You can also select “City Center” if you do not know the street name or wish to navigate to the center.

**< House Number >** – type here the house number. If you do not know the house number, you may select “Anywhere” to be taken to the nearest point in this street or Crossing.

Note: If the house number you typed does not appear, NDrive will offer you the nearest number available.

**The GO screen** – This screen displays the information about the destination you selected. It can contain an address, a place name or even additional information, if available. At the bottom of this screen, you will find the weather conditions in your destination (requires internet connection). Click on the weather tab to receive a 3-day forecast from MyWeather.com

**Show** – Displays the selected destination on the map. Click anywhere on the map to set your current location there, which will be presented by a red dot.

**Save** – Use this button to save this location in your favourites.

**Share** – Use this button to share this location using your Facebook account (requires internet connection). It will allow your Facebook friends to see where you are heading.

**Contact** Contact – If there is additional information about the selected location (usually a Point of Interest) this button allows you to call, go to the website or email this location.

**Navigate** – Click on this button to start live turn-by-turn guidance to the destination you selected. If your software version does not include live guidance, this button will show the route to your selected location.

Allows you to search or navigate to Points of Interest (POI) on the map or by using various online sources

A POI located around your location, according to GPS signal, or a previously selected location.

A POI in a specific or remote location.

Search for places in a different city or even in a different state or country using Google online search engine to find a POI.

Search for a Foursquare venues, Here you may search for places in a different city or even in a different state or country.

Using the special keyboard, you may search for coordinates using the Lat/Lon format.

Allows you to search for a destination by typing in the Postcode (Zip) of the location; this function is only enabled only with maps that contain postcode data.

Here you can see a list of all your previously selected locations. Click on any of them to navigate or show it on the map.

These are pre-defined locations that you have created. See the "How to" section for further information.

Pre-define a location you use more often, such as your home, work etc. On the first click, it will ask you to set that destination. You can edit/change it at any time from My NDrive menu.

This is a pre-defined set of destinations that you have created. See the "How to" section for further information.

This button is enabled only when a destination has been selected and a route has been calculated. It will allow you to consult additional information about your route.

Displays your route from the current position to your destination on the map.

Displays a list of all the maneuvers from your current position to your destination. You may click on one of them to see it on the map.

Stops the current turn-by-turn & voice guidance.

Configure route calculation options, such as Fastest, Shortest, using Metro (where available) and Pedestrian.

This button gives you the option to calculate an alternative route; place a Roadblock (if for any reason a part of the route is blocked); avoid part of the route (due to traffic or other info) or re-calculate the original route if you made any changes.

Displays online Traffic info (requires internet connection).

List of traffic events that are relevant to the current route.

Here you can switch online traffic on or off. Select automatic traffic jams avoidance - any route with traffic events will be automatically avoided - or manual - you will be notified of traffic events and decide whether you want to avoid them or not.

Manually updates the traffic information (requires internet connection).

Re-calculates the route avoiding traffic jams, as much as possible.

This button is disabled after the route has been re-calculated using the "Avoid jams" option. In this case, delays are already minimized for the current route

To report an incident, click on this button to send an email to [traffic.incident.report@ndrive.com](mailto:traffic.incident.report@ndrive.com). The coordinates of your location will be automatically added on the e-mail and you can also freely add text. This option may not be available in all NDrive versions. (requires internet connection)

Here you may change the settings and learn about your software.

Define your Home location from an address, place of interest, recent location, favourite or your current location (Here). This allows you to quickly navigate there. You may edit or change this location at any time.

Customize the way NDrive is displayed, navigates, uses the GPS and others. For further details see the "How to" section.

Report eventual problems or map errors (requires internet connection).

Displays information about the following items of your software:

Contains detailed information about the NDrive software version you own.

Displays a list of the maps you have installed on your device. By clicking on them you have access to the following options: Show – shows the selected map; About – detailed information about the map version and its provider; Check – verifies map file consistency.

By selecting this option, the start-up wizard will be displayed the next time you initiate NDrive, displaying the Legal Info.

Displays online help from [www.ndrive.com](http://www.ndrive.com)

Displays a screen with detailed information about the coordinates of your current location; the number of satellites to which your device is connected; the speed you're travelling; the altitude at your location and a compass showing your orientation.

If you have a serial number to activate your map, insert it here.

This button allows you to import or export files such as favourites or itineraries.

Displays offers and advertisements received on your device. You may use the tabs on the bottom to toggle between "nearby", "recent" and your "stored" ads. (requires internet connection)

Here you may download easily and securely additional content to your NDrive such as additional Worldwide Maps and Map Updates, Voices, Real Navigation city photos, Premium Weather and more. (requires Internet connection)

**Store** – Displays a list of items available items for your device. Check this it regularly as we are adding new offers on a weekly basis.
